

Aspen Stand Regeneration: Stem Tally Form

Date

Forest, District:		Allotment, Pasture:	
Site ID #	GPS Location		Elevation
% Slope	Aspect	General stand notes	
<u>Recorder</u> & Group Members			

Tran- sect Number (e.g. 1, 2)	Tallest Leader Foot segment (0 -6')	Tallest leader damage code (0,1,4,7)	Sub-leader(s) damage code (leaders w/in 6'' of tallest leader) (0, 1, 4, 7)	Damage Codes, plant (2,3,5,6, 8-11)	DBH aspen if taller than 6'	Other species tree Foot segment up to 6' DBH if taller than 6'	Notes on individual ramet/tree
Damage Codes					Definitions		
0 = No Damage 1 = Browsing 2 = Branches Stripped 3 = Browsing plus branches stripped (replaces Basal Stem wound) 4 = Frost 5 = Disease			6 = Stem Wound 7 = Dead Leader 8 = Aspen stem mortality 9 = Insects 10 = Snow break 11 = Rodents		Leader = This year's growth, vertically oriented Foot segment = 0-1; 1.1-2; 2.1-3; to 6 feet DBH. = diameter at breast height (4.5 ft on uphill side of the tree) *For each sucker tallied, code the damage (if any) most likely to affect the future vigor of the tree. For example, if a sucker has an uninfected stem wound and the terminal leader is browsed, code it as browsed. If the wound is infected, code the stem wound instead.
